

## **ClaimsXten™ Claims Editing Tool – Update**

We successfully completed the implementation of ClaimsXten™, our new claims editing tool for CMS-1500 claim submissions. This tool, developed by McKesson Health Solutions, allows us to be consistent with nationally accepted coding guidelines and other payers in the industry as well as facilitate accurate, efficient claims processing. Claims processed on or after **July 18, 2008** will be subject to this editing logic.

Also on July 18, 2008, our web-based tool – Clear Claim Connection™ - was updated to incorporate the ClaimsXten editing rules. Clear Claim Connection includes an interface that allows you to enter claim scenarios and view the clinical rationale for any editing changes. If you have not used Clear Claim Connection previously, we would like to take this opportunity to encourage you to access this user-friendly tool to explore the ClaimsXten changes. Clear Claim Connection may be accessed from ProviderAccess on our web site. Please note that a user ID and password are required to access this application.
